

Week 1 Activity

June 11, 2021

Activities done this week

Day 2

Working time

<2021-06-08 Tue 09:30> to <2021-06-08 Tue 14:30>

Things done

- **Watced** a video for all the key details in **breif** of the technical concepts. These concepts were essential in understanding how WebRTC technology works.

Day 3

Working time

<2021-06-09 Wed 09:30> to <2021-06-09 Wed 14:30>

Things done

- Notes made for all the new terms and concepts learnt, so that I can refer to it again as need be.
- Started working on the initial documentation, jotting down all the requirements.

Day 4

Working time

<2021-06-10 Thu 09:30> to <2021-06-10 Thu 14:30>

Things done

- Set up a git remote repo with an active workflow with local repo, so that during the implementation phase, I can implement and push the feature directly to remote, for safety and organization purposes. Made tech mentor collaborator in repo.
- Learnt how to make two local browsers communicate with each other by sending text streams.

Day 5

Working time

<2021-06-11 Fri 08:30> to <2021-06-11 Fri 12:30>

Things done

- Worked on how we can make two local browsers send media streams between each other.

This week's achievements

DONE Set up a working git repo, for seamless workflow.

DONE Set up and hosted the initial documentation file

DONE Made two local browser send text data between themselves.

Next week's goals

TODO Make two local browsers send media data between themselves.

TODO Make two browsers in different networks send text data between themselves.

TODO Make two browsers in different networks send media data between themselves.
